

Pressure nutsch Type DN 420-320

For the operation e.g. with containment systems VSDIN

For applications in which the filling and filtration of the product is to take place outside the isolator, PINK has designed a mobile pressure nutsch, which docks on contamination-free.

Technical data

Inner diameter: 420 mm

Inner height: 320 mm

Usable volume: 45 l

Mat.: stainless steel 316L or Hastelloy C22

Operating temperature: -20 up to +120 °C

Operating pressure: -1 up to 6 bar

System features

- Separation of liquid and solid products
- Cake filtration of concentrated suspensions
- Type and size according to specific product and process requirements
- Filtration in a self-contained system
- Removable filter basket

Options

- Shrink-wrapped floor drain
- CIP
- Process-optimized flange configuration
- Rupture disk, pressure indicator, sight glasses
- For use inside or outside the isolator
- Heated double-walled design

A mobile pressure nutsch with removable filter insert is integrated in the isolator.
